1
00:00:00,050 --> 00:00:01,947
Clint Curtis Election Integrity expert Democrat Attorney:
I wrote the initial prototype and

2
00:00:01,957 --> 00:00:06,009
in that very initial prototype for
the first machine rolled out was the

3
00:00:06,009 --> 00:00:10,278
request to have language in it that
could allow for the votes to be flipped.

4
00:00:10,846 --> 00:00:14,896
So using electronic voting, voting
machines is just generally a bad idea,

5
00:00:14,898 --> 00:00:17,673
which is what I told them way back
when, is, you know, you can't check it.

6
00:00:18,389 --> 00:00:22,480
Um, what we did in Shasta County,
'cause I'm the RB of Shasta County,

7
00:00:22,711 --> 00:00:27,627
is we've actually put video above
the ballots so you see every ballot

8
00:00:27,627 --> 00:00:29,167
before it goes in the machine.

9
00:00:30,037 --> 00:00:31,884
That effectively neuters the machine.

10
00:00:31,884 --> 00:00:33,507
It doesn't mean you have good ballots.

11
00:00:33,569 --> 00:00:36,098
It means that your total will

be the s- correct when you're

12
00:00:36,098 --> 00:00:38,365
done, and a citizen can check it.

13
00:00:39,031 --> 00:00:41,771
Without that, you are completely lost.

14
00:00:42,122 --> 00:00:46,941
So you kind of need to push to have
that video of the ballots pre-machine

15
00:00:47,250 --> 00:00:51,776
because then if the machine cheats
you, it will be caught, and then they

16
00:00:51,778 --> 00:00:54,412
can't make voting machines anymore, and
they make a lot of money at that, so

17
00:00:54,412 --> 00:00:56,149
they're gonna play it safe that way.

18
00:00:57,064 --> 00:00:59,925
Bob Rust Attorney Host: Uh, b- real
quick for Jeannette's purposes, your p-

19
00:00:59,931 --> 00:01:02,042
current position in Shasta County is what?

20
00:01:02,806 --> 00:01:04,252
Clint Curtis Election Integrity expert Democrat Attorney:
I am the registrar of voters,

21
00:01:04,254 --> 00:01:07,053
which is the supervisor of
elections, and the county clerk.

22
00:01:07,759 --> 00:01:11,077

Bob Rust Attorney Host: So you're talking
to someone in California, Jeannette, who

23
00:01:11,077 --> 00:01:16,295
has the responsibility to make sure that
the voting is done in a proper fashion.

24
00:01:16,941 --> 00:01:20,279
You heard his, his response as it
relates to the electronic voting machine.

25
00:01:20,297 --> 00:01:21,925
What would you ask further, Jeannette?

26
00:01:22,841 --> 00:01:24,762
Jeannette Wrobel Lehigh County Committee person:
I guess really the only other question

27
00:01:24,762 --> 00:01:31,500
that, for that particular case is,
um, if they were recorded, how, um-

28
00:01:33,716 --> 00:01:34,708
They're just recording those ballots.

29
00:01:34,710 --> 00:01:36,526
There's no tracking of those ballots.

30
00:01:36,534 --> 00:01:39,606
So they can essentially, unless
you actually have the number there

31
00:01:39,607 --> 00:01:43,983
to count to the paper ballots to
count against the video, you can

32
00:01:44,062 --> 00:01:46,857
add as many ballots into that.

33

00:01:47,170 --> 00:01:50,005
You can re-scan stacks of
ballots and, and that with no-

34
00:01:50,082 --> 00:01:51,515
in those machines with no issue.

35
00:01:51,953 --> 00:01:52,257
Correct?

36
00:01:52,374 --> 00:01:52,998
Clint Curtis Election Integrity expert Democrat Attorney:
Absolutely.

37
00:01:53,009 --> 00:01:56,254
You can do anything you want
by continuing to restack it.

38
00:01:56,614 --> 00:02:00,782
But if you've marked them correctly
and you have oversight, we have

39
00:02:00,986 --> 00:02:05,057
obser- observers that can just sit
right on the, next to the people

40
00:02:05,058 --> 00:02:06,352
to actually watch how it's done.

41
00:02:06,796 --> 00:02:10,596
And we get them all bagged up,
and they're tagged, so there's 50

42
00:02:10,598 --> 00:02:12,099
a piece, and they're all marked.

43
00:02:12,390 --> 00:02:17,054
So as you look at those tags, they
could not put that bag back through.

44
00:02:17,058 --> 00:02:20,991
They'd have to have some other
nefarious system that would basically

45
00:02:20,992 --> 00:02:24,297
re-tag the bag to put it back through.

46
00:02:24,871 --> 00:02:25,010
Okay.

47
00:02:25,010 --> 00:02:26,098
And then- So you have watchers there

48
00:02:26,098 --> 00:02:27,420
we're … Yeah.

49
00:02:27,510 --> 00:02:32,116
And then it no longer matches your
incoming because as the ballots come in,

50
00:02:32,132 --> 00:02:35,954
you have a group of people that sit there
and count them, and they keep a log.

51
00:02:36,813 --> 00:02:39,818
Now, unfortunately, they usually
don't match the incoming,

52
00:02:39,818 --> 00:02:41,436
which is another real concern.

53
00:02:41,910 --> 00:02:48,671
Uh, Riverside County down in,
um, California, they had 611,000

54
00:02:48,687 --> 00:02:52,637
ballots logged as coming in, and
when they were done counting,

55
00:02:52,640 --> 00:02:55,743
they had 665,000 ballots counted.

56
00:02:57,164 --> 00:02:59,670
And they've been arguing over
if the sheriff could even count

57
00:02:59,671 --> 00:03:00,748
the ballots to check them.

58
00:03:00,845 --> 00:03:03,456
So, you know, it's a, it's dirty.

59
00:03:03,511 --> 00:03:04,456
It's just dirty.

60
00:03:04,468 --> 00:03:07,683
And I don't know how bad it is in
Pennsylvania, but in California,

61
00:03:07,688 --> 00:03:08,892
they don't care if it's dirty.

62
00:03:08,892 --> 00:03:10,613
They just are proud of it, I think.
