1
00:00:00,049 --> 00:00:02,139
Clint Curtis Election Integrity expert Democrat Attorney:
In the prototype I wrote, I rewrote

2
00:00:02,140 --> 00:00:05,328
the log files, I rewrote the database,
I rewrote the time structure.

3
00:00:05,635 --> 00:00:09,061
So once I made the flip, even
the prototype, because it's that

4
00:00:09,062 --> 00:00:11,307
simple, you could never catch it.

5
00:00:11,924 --> 00:00:12,606
Impossible.

6
00:00:12,694 --> 00:00:16,121
No matter how much you checked it after
the fact, you would not see the flip.

7
00:00:18,061 --> 00:00:19,153
That's why you can't use computers.

8
00:00:19,355 --> 00:00:19,730
Jeannette Wrobel Lehigh County Committee person:
Yeah.

9
00:00:29,810 --> 00:00:30,273
Bob Rust Attorney Host: There we go.

10
00:00:30,784 --> 00:00:31,180
All right.

11
00:00:31,884 --> 00:00:35,001
You're just leading me into
your next, I know, question.

12
00:00:35,013 --> 00:00:40,962
It's very vital to you, Jeanette, and
that is you've just discussed how, uh,

13
00:00:40,975 --> 00:00:43,529
the voting system can be manipulated.

14
00:00:44,648 --> 00:00:47,630
But, Kurt, how can you prove it?

15
00:00:47,834 --> 00:00:52,395
And I'm particularly thinking here, uh,
in Pennsylvania that, uh, how could…

16
00:00:52,404 --> 00:00:57,436
What evidence would, uh, would
Jeanette or any of- anyone need before

17
00:00:57,437 --> 00:01:01,286
concluding that the electronic, uh,
election fraud actually occurred

18
00:01:01,748 --> 00:01:03,206
in Lehigh County, Pennsylvania?

19
00:01:03,863 --> 00:01:07,869
Clint Curtis Election Integrity expert Democrat Attorney:
Well, unless you can actually videotape

20
00:01:07,869 --> 00:01:12,112
it ahead of time, there's no way to
get to the proof because they lock

21
00:01:12,113 --> 00:01:15,128
you out of the source code, they lock
you out of observation, they lock you

22
00:01:15,128 --> 00:01:16,801
out of being able to redo the ballots.

23
00:01:16,814 --> 00:01:16,824
Yeah.

24
00:01:17,125 --> 00:01:20,639
So you're pretty much secured away from
being able to investigate anything.

25
00:01:21,269 --> 00:01:23,374
It's kind of like, "Give me the
proof and I'll show you nothing."

26
00:01:23,599 --> 00:01:23,939
Bob Rust Attorney Host: Mm-hmm.

27
00:01:24,256 --> 00:01:25,748
Clint Curtis Election Integrity expert Democrat Attorney:
So you have no chance.

28
00:01:26,032 --> 00:01:29,689
So that's why it's important that the
president pushes in something where

29
00:01:29,689 --> 00:01:34,138
you can see the ballots ahead of
time before they touch the machine.

30
00:01:34,153 --> 00:01:38,159
Because once it goes in the machine,
everything is off the table.

31
00:01:38,726 --> 00:01:41,966
And people who think that, um,
you know, you can use ballot

32
00:01:41,968 --> 00:01:44,409
images, they don't understand.

33
00:01:44,417 --> 00:01:48,392

Programmers are the ones that make
those images, and we can remake

34
00:01:48,394 --> 00:01:50,440
them just like we remake the logs.

35
00:01:50,734 --> 00:01:54,334
So if I want an image to be
different, I can make it different.

36
00:01:54,440 --> 00:01:56,309
Those don't really exist.

37
00:01:56,727 --> 00:02:00,137
It's a matter of the programmer reading
it, the points, the dots into an

38
00:02:00,146 --> 00:02:05,227
array, and then reproducing it either
as it was or as he feels like, right?

39
00:02:06,033 --> 00:02:08,569
And then the program could go
in and do that at the same time.
